TASK 1 REPORT

Internship Program — Batch 2026

Submitted By:	Noor UL Eman / Mtech-Web26028
Department:	Full Stack Web Development
Submitted To:	Mohazin Zahid
Date:	05, July 2026

1. Introduction

CryptoVerse Live Dashboard

CryptoVerse is a responsive cryptocurrency dashboard developed using HTML5, CSS3, and Vanilla JavaScript. The project provides real-time cryptocurrency market information through the CoinGecko API while presenting the data in a modern glassmorphism user interface.

The application enables users to explore market trends, analyze cryptocurrency prices through interactive charts, manage a personalized watchlist, and view detailed information for individual cryptocurrencies. The project also integrates Three.js for 3D visual effects and GSAP for smooth animations to improve user experience.

The main objective of this project was to strengthen frontend development skills by building a professional real-world web application completely from scratch without using frontend frameworks.

2. Objectives

The objectives of this project were:

- Build a complete cryptocurrency dashboard using HTML, CSS, and JavaScript.
- Fetch and display live cryptocurrency market data using the CoinGecko API.
- Design a fully responsive interface for desktops, tablet, and mobile devices.
- Implement interactive charts using Chart.js.
- Integrate Three.js to create modern 3D visual elements.
- Apply GSAP animations for smooth page transitions and interactive effects.
- Implement browser Local Storage to manage the user's watchlist and theme preferences.
- Improve JavaScript programming, API integration, and DOM manipulation skills.

3. Task Description

The assigned task was to build a complete, responsive web application using **HTML, CSS, and JavaScript**, while incorporating modern frontend technologies such as **Three.js** or **GSAP**. The application was required to include a professional user interface, responsive design for desktop, tablet, and mobile devices, API integration, interactive functionality, proper documentation, GitHub deployment, and a live hosted version. The completed project fulfilled these requirements through the development of the CryptoVerse cryptocurrency dashboard.

4. Work Done

During the internship, I successfully developed **CryptoVerse**, a futuristic cryptocurrency dashboard from scratch. The project involved designing the user interface, implementing responsive layouts, integrating live cryptocurrency market data using the CoinGecko API, and adding interactive features such as cryptocurrency search, detailed coin analysis, price charts, and a personalized watchlist. I also integrated Three.js for 3D visual effects, GSAP for smooth animations, and Local Storage for persistent user preferences. Finally, the project was tested, documented, uploaded to GitHub, and deployed using GitHub Pages

5. Challenges Faced

During development, several challenges were encountered, including:

- Understanding and integrating the CoinGecko API.
 - Managing asynchronous API requests using async/await.
 - Building reusable JavaScript modules.
 - Implementing responsive layouts across different screen sizes.
 - Synchronizing watchlist data with Local Storage.
 - Debugging JavaScript rendering issues.
 - Optimizing animations for smooth performance.
 - Organizing project files for better maintainability.
-

6. Key Learnings

- Strengthened proficiency in HTML5, CSS3, and Vanilla JavaScript.
 - Learned to integrate REST APIs and handle asynchronous data using Fetch API and async/await.
 - Improved responsive web design skills using Flexbox, CSS Grid, and media queries.
 - Gained practical experience with Three.js for 3D graphics and GSAP for animations.
 - Learned to create interactive charts using Chart.js.
 - Implemented Local Storage to maintain user preferences and watchlist data.
 - Improved debugging, code organization, and modular JavaScript development.
 - Gained experience with Git, GitHub, GitHub Pages, and professional project documentation.
-

7. Conclusion

The CryptoVerse project was completed successfully according to the internship requirements. The project significantly improved my understanding of frontend web development, API integration, responsive interface design, JavaScript programming, browser storage, animation libraries, and modern UI development.

This project strengthened my practical skills in building a professional real-world web application from scratch while following clean coding practices and project organization standards.
