TASK 1 REPORT

Internship Program — Batch 2026

Submitted By:	Noor UL Eman / Mtech-Web26028
Department:	Full Stack Web Development
Submitted To:	Mohazin Zahid
Date:	05, July 2026

1. Introduction

This report presents the work completed for **Task 3** of the M-Tech Production & Marketing Internship Program. The objective of this task was to develop a fully functional calculator using HTML, CSS, and Vanilla JavaScript while applying frontend development concepts. The project focused on creating a responsive, user-friendly, and modern calculator interface with essential arithmetic operations and interactive features.

2. Objectives

- Develop a calculator using HTML, CSS, and JavaScript.
 - Practice JavaScript DOM manipulation and event handling.
 - Design a modern and responsive user interface.
 - Implement error handling for invalid calculations.
 - Improve problem-solving and front-end development skills.
-

3. Task Description

The assigned task was to create a professional calculator application using only HTML, CSS, and Vanilla JavaScript. The calculator was required to support basic arithmetic operations, decimal calculations, clear and delete functions, real-time display updates, error handling, keyboard support, responsive design, and a modern user interface.

4. Work Done

The calculator project was successfully completed by implementing all the required functionalities.

The completed features include:

- Addition
- Subtraction
- Multiplication
- Division
- Decimal calculations
- Clear (AC) button
- Delete (DEL) button
- Real-time display updates
- Error handling

- Keyboard support
- Responsive design
- Modern dark-themed user interface
- Smooth button hover effects and animations

The project files were organized into separate HTML, CSS, JavaScript, and README files following the required project structure.

Modern Calculator and 2 more pages - Personal - Microsoft Edge 2026-07-05 14-24-22.mp4

(double click on that link .you can see the demo/working of calculator)

5. Challenges Faced

During the development process, several challenges were encountered:

- Handling invalid mathematical expressions.
- Implementing keyboard support for all calculator buttons.
- Designing a responsive layout for different screen sizes.
- Maintaining clean and readable JavaScript code.
- Creating a professional user interface while keeping the project beginner-friendly.

These challenges were resolved through testing, debugging, and code optimization

6. Key Learnings

Through this task, I learned:

- HTML page structure.
- CSS Flexbox and Grid layouts.
- Responsive web design.
- DOM manipulation using JavaScript.
- Event handling.
- JavaScript functions.
- Input validation and error handling.
- Writing clean and organized code.
- Project folder organization.
- Documentation using README files.

7. Conclusion

The Calculator Project was completed successfully according to all the given requirements. The project improved my understanding of frontend web development, JavaScript programming, responsive UI design, and debugging techniques. This task strengthened my practical skills in building interactive web applications.
