1. Introduction

1. WEEK 2 — Interactive Org Chart Builder

1.1 Day 1 — Understanding the Project & Requirements

The first day was focused on understanding the requirements of the Interactive Org Chart Builder project and identifying the main concepts required for its development.

2. Objectives

- Understand the project requirements.
 - Identify the main features of the application.
 - Understand how organizational charts work.
 - Research suitable technologies for the project.
-

3. Task Description

The assigned task was to carefully review the project requirements for the Interactive Org Chart Builder, study existing organizational chart systems, understand hierarchical company structures and parent-child employee relationships, and plan core functional features such as zooming, panning, node manipulation (add/remove), and chart exporting before initiating full-scale development.

4. Work Done

- Carefully reviewed the assigned project requirements.
 - Studied examples of organizational chart systems.
 - Researched how hierarchical company structures are represented.
 - Watched YouTube videos explaining organizational chart structures and hierarchical data.
 - Made notes about parent-child relationships between employees.
 - Identified the main features such as zoom, pan, adding/removing nodes, and export.
-

5. Challenges Faced

The main challenge was understanding how a large organizational structure could be represented in a way that remains easy to navigate and modify.

6. Key Learnings

- Concept of hierarchical data.
- Parent-child relationships.
- Basic organizational chart structure.
- Importance of planning features before development.

7. Conclusion

The day helped establish a clear understanding of the project requirements and the concepts needed before starting development. This task strengthened my foundational skills in project planning, structural analysis, and data mapping for complex interactive web applications.
