TASK 1 REPORT

Internship Program — Batch 2026

Submitted By:	Noor UL Eman / Mtech-Web26028
Department:	Full Stack Web Development
Submitted To:	Mohazin Zahid
Date:	08, August 2026

1. Introduction

1. WEEK 2 — Interactive Org Chart Builder

Interactive Org Chart Builder (Day 2 — Learning D3.js Concepts)

The second day focused mainly on learning D3.js because it was an important technology for creating the interactive organizational chart.

2. Objectives

- Understand D3.js fundamentals.
 - Learn about hierarchical layouts.
 - Understand tree visualization.
 - Explore how D3 works with web applications.
-

3. Task Description

The assigned task was to research and master foundational D3.js principles, specifically exploring SVG visualization, D3 hierarchy, tree layout mechanics, and working with hierarchical JSON data structure to lay the technical groundwork for rendering interactive org chart nodes, links, pan, and zoom behavior.

4. Work Done

- Watched several YouTube tutorials on D3.js basics.
 - Studied D3 hierarchy and tree layout concepts.
 - Learned how nodes and links are generated.
 - Practiced working with hierarchical JSON data.
 - Reviewed examples of interactive tree visualizations.
 - Made notes about how zoom and pan could later be implemented.
-

5. Challenges Faced

D3.js was initially difficult because its visualization approach was different from the usual React component-based approach.

6. Key Learnings

- ☐ D3 hierarchy.

- Tree layout.
- Nodes and links.
- SVG visualization.
- Hierarchical JSON data.

7. Conclusion

The tutorials and practical exploration helped clarify the D3.js concepts required for the project. This task improved my practical understanding of data-driven SVG rendering and interactive data visualization techniques.
