1. Introduction

1. WEEK 2 — Interactive Org Chart Builder

Interactive Org Chart Builder (Day 3 — Project Setup & Initial Implementation)

The third day focused on setting up the development environment and starting the basic structure of the Interactive Org Chart Builder.

2. Objectives

- Set up the project.
 - Configure the required technologies.
 - Create the basic application structure.
 - Start the initial UI.
-

3. Task Description

The assigned task was to establish the application foundation using Next.js, configure dependencies and TypeScript, structure project directories, design the initial UI layout, and set up the underlying organizational data structures to support chart workspace components.

4. Work Done

- Created the project using Next.js.
 - Configured the required dependencies.
 - Organized the project folders.
 - Created the basic application layout.
 - Prepared the data structure for organizational nodes.
 - Started the initial organizational chart workspace.
 - Tested the development environment.
-

5. Challenges Faced

Setting up the project structure and preparing the hierarchical data format required careful planning.

6. Key Learnings

- Next.js project structure.
- TypeScript configuration.
- Component organization.
- Basic project setup.

7. Conclusion

The basic project environment was successfully prepared, providing a foundation for further development. This task enhanced my proficiency in initializing Next.js web projects, configuring environment tools, and establishing scalable React/TypeScript file architectures.
