1. Introduction

1. WEEK 2 — Interactive Org Chart Builder

Interactive Org Chart Builder (Day 4 — Learning Interactive D3 Features)

The fourth day focused on understanding the interactive features required for the organizational chart.

2. Objectives

- Learn D3 zoom and pan.
 - Understand dynamic node positioning.
 - Learn how interactive visualizations respond to user actions.
-

3. Task Description

The assigned task was to study and test advanced interactive D3.js features including zoom behavior, panning mechanisms, SVG coordinate transformations, dynamic node positioning, and collapsible tree implementations to prepare for user-driven interactions in the organizational chart.

4. Work Done

- Watched YouTube tutorials on D3 zoom and pan.
 - Studied examples of zoomable tree diagrams.
 - Practiced applying zoom transformations.
 - Learned how SVG groups can be transformed.
 - Explored how nodes can be dynamically repositioned.
 - Reviewed examples of collapsible organizational trees.
-

5. Challenges Faced

Understanding transformations and coordinate systems was challenging, especially when combining zooming with a large tree structure.

6. Key Learnings

- D3 zoom behavior.
- Pan and transform concepts.
- SVG coordinate systems.
- Interactive visualization techniques.

7. Conclusion

The day's learning helped build a stronger understanding of how the interactive behavior of the organizational chart could be implemented. This task strengthened my expertise in managing complex canvas interactions, coordinate mapping, and user event handling within dynamic SVG views.
