TASK 1 REPORT

Internship Program — Batch 2026

Submitted By:	Noor UL Eman / Mtech-Web26028
Department:	Full Stack Web Development
Submitted To:	Mohazin Zahid
Date:	08, August 2026

1. Introduction

1. WEEK 2 — Interactive Org Chart Builder

Interactive Org Chart Builder (Day 5 — Working on Chart Features)

The fifth day focused on applying the concepts learned during the previous days to the project.

2. Objectives

- Improve the organizational chart.
 - Implement basic node interactions.
 - Work with dynamic hierarchical data.
-

3. Task Description

The assigned task was to build out the core functional components of the interactive org chart by displaying dynamic hierarchical employee nodes, enabling node manipulation (addition and deletion), fine-tuning node spacing/positioning, testing zoom and pan functionality, and resolving layout rendering bugs across multi-level structures.

4. Work Done

- Continued development of the organizational chart.
 - Worked on displaying hierarchical employee nodes.
 - Added basic node information.
 - Tested different parent-child structures.
 - Practiced adding and removing nodes.
 - Adjusted node spacing and positioning.
 - Tested zoom and pan behavior.
 - Fixed several layout issues.
-

5. Challenges Faced

Maintaining proper spacing between nodes became difficult when the hierarchy contained multiple levels.

6. Key Learnings

- Dynamic tree rendering.
- Node positioning.
- Handling changing hierarchical data.
- Debugging visualization layouts.

7. Conclusion

The project started taking its intended form, and the concepts learned from tutorials were applied to the actual organizational chart. This task enhanced my practical expertise in real-time DOM/SVG state updates, tree node repositioning algorithms, and front-end debugging.
