1. Introduction

HabitHub — Applying Features & Integration

This report presents the work completed on Day 11, the fifth day of Week 3, for the Full Stack Web Development Internship Program at M-Tech Production & Marketing. The day focused on applying the concepts learned during the previous days to HabitHub.

2. Objectives

- Develop core HabitHub functionality.
 - Work on habit and goal management.
 - Improve the user interface.
 - Practice frontend-backend concepts.
-

3. Task Description

The assigned task was to implement primary features including CRUD operations for daily habits, visual goal tracking indicators, streak counters, and social feed interface interactions.

4. Work Done

The following work was completed during the day:

- Continued development of the HabitHub interface.
 - Worked on habit creation and tracking.
 - Added goal progress functionality.
 - Worked on streak displays.
 - Developed community and group sections.
 - Added feed-related interface elements.
 - Tested application data flow.
 - Reviewed API structure for future integration.
-

5. Challenges Faced

The following challenge was encountered during the day:

- Managing different types of user activity, such as habits, goals, and social posts, required organizing the application data carefully.

6. Key Learnings

Through this task, I learned:

- CRUD functionality.
- State management.
- Progress tracking.
- Social feed concepts.
- Structuring application data.

7. Conclusion

The main HabitHub features were progressively developed while applying the concepts studied during the week.
