1. Introduction

HabitHub — Understanding Project Requirements

This report presents the work completed on Day 7, the first day of Week 3, for the Full Stack Web Development Internship Program at M-Tech Production & Marketing. The day was focused on understanding the HabitHub project and the real-world problem it was designed to solve.

2. Objectives

- Understand the project requirements.
 - Identify the target users.
 - Understand habit and goal tracking.
 - Plan the main application modules.
-

3. Task Description

The assigned task was to research habit-tracking architectures, analyze streak systems and community accountability models, outline project requirements, and plan the core functional modules for HabitHub.

4. Work Done

The following work was completed during the day:

- Reviewed the HabitHub project requirements.
 - Studied existing habit-tracking applications.
 - Watched YouTube videos about habit tracking apps and accountability systems.
 - Researched how streak systems work.
 - Studied the concept of accountability groups.
 - Listed the main features required for the application.
-

5. Challenges Faced

The following challenge was encountered during the day:

- The main challenge was deciding how to combine personal habit tracking with social and community features without making the application unnecessarily complicated.

6. Key Learnings

Through this task, I learned:

- Habit tracking concepts.
- Goal management.
- Accountability systems.
- Feature planning.

7. Conclusion

The day provided a clear understanding of the purpose and major functionality of HabitHub.
