1. Introduction

HabitHub — Learning Next.js & UI Concepts

This report presents the work completed on Day 8, the second day of Week 3, for the Full Stack Web Development Internship Program at M-Tech Production & Marketing. The day focused on improving understanding of Next.js and modern UI development concepts needed for HabitHub.

2. Objectives

- Understand Next.js App Router.
 - Learn component organization.
 - Explore responsive UI techniques.
 - Plan the application interface.
-

3. Task Description

The assigned task was to study Next.js App Router conventions, learn component composition patterns, master Tailwind CSS utilities, and design modular dashboard layouts suited for tracking daily habits and long-term goals.

4. Work Done

The following work was completed during the day:

- Watched YouTube tutorials on Next.js App Router and React component structure.
 - Reviewed examples of dashboard layouts.
 - Studied responsive design techniques.
 - Explored Tailwind CSS utilities.
 - Researched suitable layouts for habit and goal dashboards.
 - Made notes about reusable components.
-

5. Challenges Faced

The following challenge was encountered during the day:

- Choosing a suitable layout that could display multiple types of information while remaining simple was challenging.

6. Key Learnings

Through this task, I learned:

- Next.js App Router.
- React components.
- Tailwind CSS.
- Responsive UI design.
- Reusable components.

7. Conclusion

The learning activities helped clarify the technical and design approach for developing Habithub.
