1. Introduction

HabitHub — Project Setup

This report presents the work completed on Day 9, the third day of Week 3, for the Full Stack Web Development Internship Program at M-Tech Production & Marketing. The day focused on setting up the HabitHub project and creating its initial structure.

2. Objectives

- Set up the Next.js project.
 - Configure the development environment.
 - Create the initial application structure.
 - Establish the basic design system.
-

3. Task Description

The assigned task was to initialize the HabitHub workspace, configure TypeScript and Tailwind CSS, implement base navigation elements, construct dashboard views, and establish strong static data interfaces.

4. Work Done

The following work was completed during the day:

- Created the HabitHub Next.js project.
 - Configured TypeScript and Tailwind CSS.
 - Organized the frontend folders.
 - Created reusable UI components.
 - Set up the basic navigation.
 - Created the initial dashboard structure.
 - Prepared the basic data interfaces for habits and goals.
-

5. Challenges Faced

The following challenge was encountered during the day:

- Organizing the project into reusable components while keeping the structure simple required careful planning.

6. Key Learnings

Through this task, I learned:

- Next.js project setup.
- TypeScript interfaces.
- Component organization.
- Tailwind CSS configuration.

7. Conclusion

The basic HabitHub project structure was successfully created and prepared for further development.
